

LE3 Integration with Bluestreak

Streamlining Load Management through Seamless Integration

Overview

Super Systems Inc.'s Load Entry 3 system integrates with Bluestreak to automatically exchange load data, supporting efficient execution and accurate load tracking.

- **On-Premise Only.** Integration is supported exclusively with on-premise installations of Bluestreak*

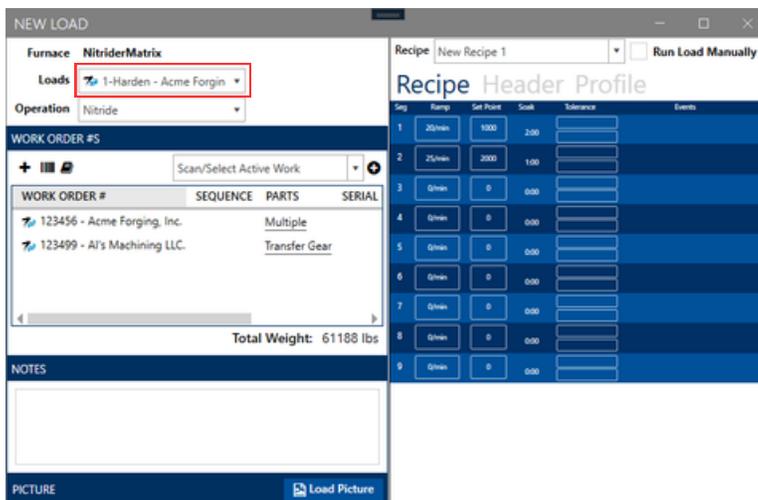

Integration Setup

Enter Bluestreak's server path in LE3 to enable load synchronization. If the server path is blank, Bluestreak will be unavailable.

Bluestreak

Bluestreak Server Path

Load Selection

- Loads from Bluestreak are available in the “New Load” window
- Selecting a Bluestreak load automatically populates work orders and parts
- Loads are immediate-no queue
- Bluestreak icon 

Operation Workflow

1 Select Operation & Recipe

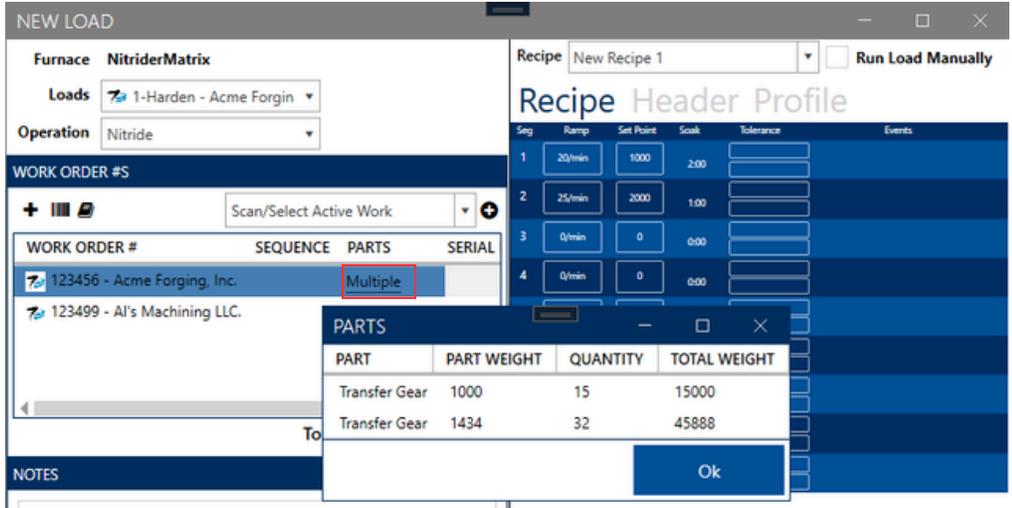

Figure: Load selection in LE3

2 Monitor Active Load

- Bluestreak loads are visible in the Active tab exclusively while the load is actively running

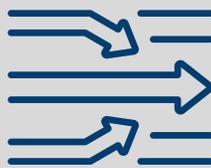

3 Completion & Feedback

- Upon completion, LE3 sends time-out details back to Bluestreak

Key Benefits of LE3 + Bluestreak Integration

Enhanced Accuracy
