LE3 Integration with C3

Simplifying Management of Heat Treat Maintenance Tasks

Overview

Super Systems Inc.'s LE3 control system integrates with C3 pyrometry software to support the management of heat treat maintenance activities and AMS and CQI-9 compliance requirements.

Key Details

Maintenance Module Requirement

- C3 integration requires the LE3 Maintenance module to be enabled in system Settings.

C3 Login

- Once enabled, users can log in to C3 using their C3 account credentials

Furnace Name Configuration

- Configure each furnace with the corresponding C3 furnace name
- Names MUST match exactly as they appear in C3

Viewing C3 Maintenance Tasks

- Maintenance tasks that are due can be accessed by clicking the wrench icon on the furnace tile ONLY (not the overview tab).

Task Completion

- When a user clicks the start button on any C3 maintenance task it will direct them to the C3 portal for task completion
- C3 completed tasks will NOT be displayed in the Maintenance Overview History tab
