# Press Release

### Cincinnati, OH – July 2006:

Barnes Aerospace Completes Vacuum Furnace Controls and Software Upgrade Utilizing Super Systems Inc. Products

Barnes Aerospace has successfully implemented Super Systems controls and software to provide the vacuum heat treat department with a state of the art control solution at its West Chester, OH facility. Barnes Aerospace is a worldwide producer of machined and fabricated components and assemblies for aircraft engine and airframe builders. Barnes Aerospace also provides component overhaul and repair for most of the world's major commercial airlines and the military.

"Barnes Aerospace continues to invest in advanced equipment and technology," said Ginger Wagner, Health, Safety, and Environmental Affairs Manager, Barnes Aerospace West Chester. "We selected Super Systems due to the broad product offering and understanding of our heat treating processes."

"Our systems are a very good fit for Barnes Aerospace because they required a programmable controller for their vacuum furnaces along with a supervisory control and data acquisition system that provides them with complete traceability of furnace loads", said Stephen Thompson, President of Super Systems. The system provides state of the art controls for their 3 vacuum furnaces using SSi's Model 9220 programmable multi-loop vacuum controllers. SuperDATA<sup>TM</sup>, SSi's supervisory control and data acquisition software, allows operators and supervisors to have full control of the process, monitor alarm and event functions, and view the process historically and in real-time.

Super Systems Inc. based in Cincinnati, OH. develops and manufactures products for the thermal process industry. Products include oxygen probes, analyzers, controllers, software solutions and engineered systems. SSi personnel have over a hundred years of combined experience in addressing industry demands, assisting our customers to be more efficient and produce better quality products. At SSi, our customers are our number one priority and we continue to set high standards for supporting our customers.
