Super Systems Inc. Strengthens Commitment to West Coast Customer Base

In an effort to strengthen its commitment to servicing its existing and future customer base, Super Systems Inc. (SSi) of Cincinnati, Ohio, is pleased to announce the relocation of one of its Field Service Engineers to Southern California. The Southern California location will provide customers in the Western United States with the technical expertise on heat treating equipment necessary to support the current installs and future opportunities.

“Steven Christopher is a seasoned engineer in this industry with a skill set that is perfect for leading a team in a remote office for us,” explains Steve Thompson, president of SSi. “The manufacturing base on the west coast is healthy, and we only see opportunities increasing from our expanded products and services for the heat treating industry.”

With offices around the world, SSi supports thousands of global heat treating applications. International offices include SSi Europe in Birmingham, England; SSi Mexico in Queretaro; and SSi China in Shanghai. In early 2015, SSi will officially be opening a location in India as well.

Super Systems Inc., based in Cincinnati, Ohio, has been developing and manufacturing products for the thermal processing industry since 1995. SSi’s products include probes, analyzers, controllers, software solutions and engineered systems. With over 100 years of combined experience, SSi continues to satisfy industry demands with innovative technology, enabling customers to be more efficient and to produce higher quality products.
